

MAV-37 Helicopter Fuel Tank Respiratory Protection Kit

A complete, portable kit to supply clean breathable air to personnel entering fuel tanks for inspection or repair. All equipment stores within one tough, reusable container that can be manually transported. Functions with portable or stationary AC electrical power supply. Smaller size footprint for mobility/deployment conditions. Supplies breathable air to operate up to two constant flow, type C, NIOSH approved RC-80 respirators.

SYSTEM CONTENTS

- NF27-1 electric driven, explosion proof oil-less ambient air breathing pump
- Full Face Supplied Air RC-80 Respirator with 100 ft. Of Hose with Attachment Fittings
- Box of 10 replacement filter cartridges for air pump
- Impact and crush resistant reusable container

SPECIFICATIONS

Classification:	Electric Driven Ambient Air Breathing Pump
Power Supply Requirements:	115-volt, single phase, 60 Hz AC electrical current
Air Filtration:	HEPA rated
Air Pressure Gauge:	0-15 psi
Pressure Relief Valve:	Factory set to 15 psi
Filter Service Interval:	70 - 100 hours of run time
