

SYSTEM 8 Electric Driven Breathing Set

A complete, portable kit to supply clean breathable air to personnel entering fuel tanks for inspection or repair. All equipment stores within one tough, reusable container that can be manually transported. Provides a smaller footprint for mobility/deployment operations. Functions with portable or stationary AC electrical power supply. Explosion proof design.

FEATURES AND BENEFITS

- NF-27 Electric driven ambient air breathing pump
- Two Full Face Supplied Air RC-80 Respirators with 100 ft. of Hose and Attachment Fittings
- Box of 10 replacement filter cartridges for air pump
- Impact and crush resistant reusable container

SPECIFICATIONS

Classification:	Electric Driven Ambient Air Breathing Pump
Electrical Requirements:	115 VAC, single phase, 60 HZ
Air Filtration:	HEPA rated
Air Pressure Gauge:	15 psi
Pressure Relief Valve:	Factory set to 15 psi
Filter Service Interval:	70 - 100 hours of run time

PART #	DESCRIPTION
System 8	AERIAL Electric Driven Explosion Proof Supplied Air Respiratory Protection System
