

2SJJ0069-0003 Breathing Set Pneumatic, JSF

A complete, portable system that supplies ambient breathable air to personnel entering fuel tanks for inspection or repair. All equipment stores within a tough, reusable container that can be manually transported. Provides a smaller footprint for mobility / deployment operations. Functions with portable or stationary compressed air supply.

SYSTEM CONTENTS

- NF-1200A pneumatic driven oil-less ambient air breathing pump
- Two Full Face Supplied Air RC-80 Respirator with 100 ft. Of Hose with Attachment Fittings
- 100 ft. Inlet compressed air hose assembly with quick disconnect fittings
- Box of 10 replacement filter cartridges for air pump
- Impact and crush resistant reusable container

SPECIFICATIONS

Classification:	Pneumatic Driven Ambient Air Breathing System with NF-1200A
Compressed Air Supply Requirements:	Pressure: 90 psig to 110 psig (7.6 bar)
Air Filtration:	HEPA rated
Air Pressure Gauge:	0-15 psi
Pressure Relief Valve:	Factory set to 15 psi
Filter Service Interval:	70 - 100 hours of run time

PART #	DESCRIPTION
2SJJ0069-0003	AERIAL Mobile Aircraft Fuel Tank Respiratory Protection System, JSF

Berry Compliant and Made In U.S.A.
